Clinical Evaluation Forms

Completing the clinical evaluation forms is done electronically for all three clinical courses (First Semester – Foundations; Second Semester – Chronic Care; Third Semester – Acute Care).

Each semester the coach will complete each evaluation form twice. Once at midterm, and then again for the final. The clinical Site Coordinator will contact you ahead of time to give you the due dates for the midterm, and again when the final is due.

Directions for completing clinical evaluation forms:

- 1) Please access <http://nursing.ttuhsc.edu/coaches/> in order to locate the clinical evaluation tool.
- 2) Download the clinical evaluation tool file to your computer .
- 3) Open form and complete all required fields including your name and your student’s name.
 - a) Save the file with the following format: Studentlastname_semesteryear_mid-term eval (example: Jones_Spring2017_Mid-term Eval, or Jones_Spring2017_Final Eval
- 4) Complete the upper section of the form (Clinical Standards) by inputting any deductions your student may have received from the Detailed Description of Clinical Standards form . The Detailed Descriptions of Clinical Standards may be found on the coaching portal website.
- 5) Complete the remainder of the tool by clicking on the circle within each. Carefully review each section to accurately gauge your student’s performance throughout the semester. Sections 1.1.1 – 6.3.4 will be completed in this manner.
- 6) The tool is self-calculating as you complete the evaluation.
- 7) Save your work, and send a copy electronically to your Site Coordinator via email (he/she will provide you with an email address).

Please note, the tool does not have to be signed by the student at this time. The final copy will be given to the student by the Site Coordinator, and will require the student signature at that time.

The steps for completing the second and third semester clinical evaluation tools are the same.

If you need further assistance please contact your local Site Coordinator, or
