Non-Nursing Students in Interdisciplinary Nursing Courses

PURPOSE: Courses designed to be interdisciplinary are intended to encourage participation of non-nursing students with nursing students in learning activities. Non-nursing students require concurrent cross-campus or cross-school enrollment. Screening of each non-nursing student prior to enrollment in a School of Nursing course will assure that administrative arrangements are made for concurrent cross-campus or cross-school enrollment.

REVIEW: All policies in the Graduate Program Manual shall be reviewed by the Graduate Program Associate Dean/Department Chairs by December 1 of even numbered years in collaboration with the Graduate Program Council. Final approval of the Graduate Program Manual is by the Dean.

POLICY/PROCEDURE

Courses having a description indicating that they are interdisciplinary are made available to non-nursing students under the following circumstances:

1. The student is currently enrolled in a degree program at Texas Tech University Health Sciences Center or Texas Tech University.

2. The student has permission of his/her advisor to enroll in the course.

3. The student has permission of the programmatic administrator and the course facilitator of the School of Nursing course to enroll in the course.
