The purpose of the Success Program is to assist every student in learning how to effectively achieve success, which is identified (at a minimum) as remaining in nursing school and graduating on time.

Objectives: To offer resources to promote development of mature learning processes, including assistance with:

- Effective study skills
- Time management skills
- Test-taking skills
- Coping skills

The Success Program for the Undergraduate Programs will meet these objectives by:

1. There will be an assigned retention faculty for each program and/or cohort in the Undergraduate Programs. (See SON OP 30.841 – Role and Responsibilities of Retention Faculty.)

2. The retention faculty for the assigned program/cohort will be the primary student contact for the Success Program.

3. During orientation (or equivalent), students will be provided with information about the Success Program and the retention faculty for their program/cohort. Each student will sign page 5 (see attached document) and this signed acknowledgement will be placed in his/her student file.

4. 24-hour access to components of the Success Program (see attached document) on the School of Nursing website homepage for actual and potential students/families.

5. Additional resources (such as tutor lists, math help, study tips) will also be available under the Success Program tab.

6. Referral to the Success Program may be done by student (self-referral), faculty recommendation or mandated by a formalized course of action.
